Prashik Lanjewar

Enterprise product designer who sees the whole system. I design the enterprise work behind big business decisions so it runs faster, holds up under pressure, and can be trusted. I thrive in the messy middle, where the brief is fuzzy and the stakes are real.

POSITIONING

Core positioning

ENTERPRISE COMMERCE

Designer II

I turn complex enterprise rules and fragmented workflows into coherent, shippable experiences, and stay with the work from problem framing through launch and learning.

Design superpower

SYSTEMS → EXPERIENCE

Making complex systems understandable without oversimplifying business reality: entities, roles, lifecycle states, rules, data dependencies, exceptions, and user decisions become information architecture, task flows, progressive disclosure, and explicit recovery paths.

Multidisciplinary foundation

DESIGN · TECHNOLOGY · ENGINEERING

New media designer, creative technologist, and mechanical engineer with a foundation in human behavior, research, and prototyping. I use technology and art to turn ideas into personalized experiences and user-focused products.

PROOF PILLARS

Systems thinking

MODEL BEFORE UI

Map entities, roles, lifecycle states, dependencies, rules, and exceptions before converging on interface.

Cross-functional execution

FRAME THROUGH DELIVERY

Partner across product, engineering, research, operations, business, and leadership through walkthroughs, reviews, UAT, pilots, GA, and triage.

Growth into product leadership

SCOPE AND SYSTEMS

Influence phasing, measurement, automation, compliance, narrative, and the success of other designers.

CAREER ARC

Domain depth

2022

Reservations, regional invoice concepts, partner ordering, and cognitive walkthroughs established full-cycle delivery practice.

Orders ownership

2023

Moved fuzzy requirements through phased design, research, handoff, UAT, and pilot; coached a counterpart and contributed to coherence.

Launch + modernization

2024

Supported ordering and credits GA, legacy-tool retirement, operations workflows, modernization preparation, accessibility activity, issue resolution, and material security-risk escalation.

Broader product scope

2025

Expanded into Commerce Insights, customer self-service, enterprise-customer security work, post-release analysis, platform strategy, and leadership storytelling.

System-level practice

2026

Worked across product fundamentals, legacy retirement, automation, compliance, delivery readiness, and AI-assisted prototyping and documentation.

EXPERIENCE

Microsoft

JUL 2022 — PRESENT · INDIA

UX Designer II · Sep 2024 — Present

Designing enterprise commerce experiences across ordering, agreements, deals pricing, renewals, invoices, operations, and AI-assisted practice.

Hurrey Tech Ventures

NOV 2020 — AUG 2021 · INDIA

Design Lead

Led branding, UX research, UI, prototyping, interaction design, product testing, execution, and intern management.

Wipro Digital

JAN 2020 — JUL 2020 · CHENNAI

Design Innovation Intern

Explored gamification in personal finance and created a personalized VR financial-literacy experience for Indian millennials.

IFB Industries Ltd

JUN 2019 — JAN 2020 · GOA

Experience Design Intern

Enhanced in-store customer experiences at IFB Points through retail experience design and future-store concepts.

Narangi Brush

JAN 2016 — DEC 2017 · NAGPUR

Space Designer

Worked at the intersection of spatial design and experience-led environments.

EDUCATION

National Institute of Design

2017 — 2020

Master's degree · New Media Design

Projects in product design, kinetic installations, virtual heritage, and ethnography.

Savitribai Phule Pune University

2012 — 2016

Bachelor's degree · Mechanical Engineering · Sinhgad Institute of Technology

Projects in underwater inspection, agricultural machinery, lake cleaning, and gaming.

CORE AREAS

- User research
- Information architecture
- Interaction design
- Journey mapping
- Rapid prototyping
- Usability testing
- Systems thinking
- Service design
- Accessibility
- Product strategy
- Cross-functional delivery
- Design leadership
- Enterprise ordering
- Seller decision support
- Operations modernization
- AI-augmented design

ACKNOWLEDGEMENTS

- Microsoft Global Hackathon 2025 Badge Recipient.
- Microsoft Aspire Program Graduate — 2-Year Leadership & Career Development Program.
- Recognised by Microsoft leaders and peers for outstanding contributions to Commerce Ordering transformation initiatives.
- R&D paper presented and published at the 1st National Undergraduate Students Conference on "Innovation in Mechanical Engineering."
