Prashik Lanjewar

Designer II at Microsoft | New Media Design at NID

Maharashtra, India

Summary

Experience Designer at Microsoft with 4+ years designing intelligent, enterprise-scale systems at the intersection of technology, human behaviour, and organisational complexity. My work focuses on system-level UX for commerce and self-serve platforms — simplifying complex workflows, reducing operational effort, and improving decision-making at scale. Track record of reducing ordering time by ~60%, driving ~80% adoption in 30 days, and supporting multi-billion-dollar enterprise transactions. Increasingly, this involves shaping AI-assisted experiences that augment human judgement while remaining transparent and trustworthy. I actively leverage AI and Copilot-driven design workflows to accelerate exploration, synthesise research, and shorten delivery cycles. Foundation in new media design (NID) and mechanical engineering.

Experience

Microsoft

4+ years

UX Designer II

September 2024 - Present

India

Designing AI-assisted, enterprise-scale commerce and self-serve systems — bringing clarity, trust, and structure to complex operational workflows across M365 Admin Centre.

- Designed a self-serve ordering experience on M365 Admin Centre replacing manual workflows — ~60% faster ordering, ~80% adoption in 30 days, 1000s of partner hours saved annually, $Ms in cost avoidance.
- Reframed an enterprise seller dashboard from a passive reporting surface into an action-driven decision system, reducing Excel dependency and embedding trust signals.
- Led design-led retirement of a mission-critical legacy order entry system supporting multi-billion-dollar transactions, applying Parity++ principles with zero UX debt carried forward.
- Conducted evaluative UX research establishing a SUS baseline of 69.6, connecting usability findings to trust, velocity, and behavioural friction.
- Served as design partner for Amazon's >$1B enterprise agreement, ensuring role segregation and security controls were UX-viable at scale.

Designer

July 2022 - September 2024

Hyderabad, Telangana, India

End-to-end design ownership of complex enterprise workflows across orders, credits, and compliance.

- Architected a scalable ordering platform across EA, Non-EA, Partner, and OSC/ROC flows — reusable patterns adopted across 4+ order types.
- Designed workflow cutting update statement processing from ~10 days to ~5 minutes. Recognised as a top efficiency win.
- Identified unrestricted edit access, missing consent flows, and zero audit trail in production-bound feature (CICR). Escalated to leadership for security-first redesign.
- Inherited delivery-blocked credits experience 3 weeks before GA. Shipped on time. Cited by leadership as key growth milestone.
- Designed unified Activity Log and Audit Report for real-time compliance traceability.
- Consolidated two legacy credits workflows into a single experience, eliminating a standalone tool.

Hurrey Tech Ventures

November 2020 - August 2021 (10 months)

Design Lead

India

Owned the overall design track across the full product family from strategy to execution. Created a new brand identity and led a major UX overhaul.

Wipro Digital

January 2020 - July 2020 (7 months)

Design Innovation Intern

Chennai, Tamil Nadu, India

Led end-to-end design of a financial sector project gamifying personal finance — research, data interpretation, strategy, storyboarding, HCI design, and prototyping.

IFB Industries Ltd

June 2019 - January 2020 (8 months)

Experience Design Intern

Goa

Enhanced in-store customer experience at IFB Points, retail experience design, and future store concepts. Contributed to VR, AR, and IoT research.

Narangi Brush

January 2016 - December 2017 (2 years)

Space Designer

Nagpur

Projects

AI Copilot Promptbook — Domain Expert System

Side Project · 2024

- Designed a structured AI promptbook with 8 operating principles, 15 playbooks, 4000+ prompts, and 20+ evidence-backed sources ensuring zero unsourced claims.
- Created a domain-agnostic framework applicable to any specialist domain.

Moments & Metrics — Visual Storytelling for Leadership

Microsoft · Ongoing

- Designed a strategic communication framework mapping journey moments to business signals and measurable outcomes for leadership audiences.

Design Beyond Screens — Physical Artefacts & Culture

Microsoft · Ongoing

- Designed hackathon T-shirts and Studio artefacts as intentional design objects — extending design impact into culture, identity, and shared memory.

Hackathon Prototyping & Cross-Functional Leadership

Microsoft · Ongoing

- Design lead across multiple hackathons — AI-native prototyping, revenue-oriented framing, cross-functional influence without authority.

Education

National Institute of Design

Master's degree, New Media Design · (2017 - 2020)

Savitribai Phule Pune University

Bachelor's degree, Mechanical Engineering · (2012 - 2016)
