

Prashik*Lanjewar*

Experience Designer – enterprise systems, AI-UX, commerce platforms.

Four years at Microsoft designing enterprise-scale commerce and self-serve systems. I specialise in system-level UX for complex operational workflows, AI-assisted experiences, and legacy-system modernisation. Track record: ~60% faster ordering, ~80% adoption in 30 days, multi-billion-dollar enterprise transactions supported. Foundation in new media design (NID) and mechanical engineering.

I EXPERIENCE

Microsoft

JULY 2022 – PRESENT · INDIA

UX Designer II

SEP 2024 – PRESENT

- Designed a self-serve ordering experience on M365 Admin Centre that replaced manual, ops-heavy workflows – **~60% faster ordering, ~80% adoption in 30 days**, 1000s of partner hours saved annually, \$Ms in cost avoidance.
- Reframed an enterprise seller dashboard from a passive reporting surface into an action-driven decision system, reducing Excel dependency and embedding trust signals throughout.
- Led design-led retirement of a mission-critical legacy order entry system supporting **multi-billion-dollar transactions**, applying Parity++ to modernise flows while carrying zero UX debt forward.
- Conducted evaluative UX research with a SUS baseline of **69.6**, connecting usability findings to trust, velocity, and behavioural friction – shifting team's quality bar from feature-complete to behaviour-complete.
- Served as design partner for Amazon's **>\$1B** enterprise agreement, ensuring role segregation and security controls were UX-viable at scale. Patterns became reusable across the platform.

Designer

JUL 2022 – SEP 2024

- Architected a scalable ordering platform across EA, Non-EA, Partner, and OSC/ROC flows. Multi-PO support, bulk editing, multi-SKU search – reusable patterns adopted across **4+ order types**.
- Designed a streamlined update statement workflow that cut processing from **~10 days to ~5 minutes**. Recognised by stakeholders as a top efficiency win.
- Proactively flagged unrestricted edit access, missing consent flows, and zero audit trail in a production-bound feature (CICR). Escalated to leadership; full security-first redesign before rollout.
- Inherited a delivery-blocked credits experience three weeks before GA. Simplified the flow, made hard scope trade-offs, shipped on time. Cited by leadership as a key growth milestone.
- Designed a unified Activity Log and Audit Report giving real-time compliance traceability, replacing fragmented email-based tracking.
- Consolidated two separate legacy credits workflows onto VL Central, reducing context-switching for ops teams and eliminating a standalone legacy tool.

Hurrey Tech Ventures

NOV 2020 – AUG 2021 · INDIA

Design Lead

NOV 2020 – AUG 2021

- Owned the overall design track across the full product family, from strategy through execution.
- Created a new brand identity and led the products through a major UX overhaul.

Wipro Digital

JAN 2020 – JUL 2020 · CHENNAI

Design Innovation Intern

JAN – JUL 2020

- Led end-to-end design of a financial-sector project gamifying personal finance – research, data interpretation, strategy, storyboarding, HCI, prototyping.

IFB Industries Ltd

JUN 2019 – JAN 2020 · GOA

Experience Design Intern

JUN 2019 – JAN 2020

- Enhanced in-store customer experience at IFB Points – retail experience and future-store concept design.
- Contributed to the research division focusing on VR, AR, and IoT applications.

Narangi Brush

JAN 2016 – DEC 2017 · NAGPUR

Space Designer

JAN 2016 – DEC 2017

II SIDE PRACTICE

A Promptbook for Copilot

SIDE PROJECT · 2024

- Designed and built a structured AI promptbook turning Copilot into a domain expert: **8 principles, 15 playbooks, 4000+ prompts**.
- Architected a reference system ensuring zero unsourced claims across 20+ published standards – trustworthy AI assistance for specialist domains.
- Created a domain-agnostic framework (principles → playbooks → prompts → references) applicable to any creative or technical domain.

Moments & Metrics

MICROSOFT · ONGOING

- Authored a strategic communication framework mapping critical journey moments to business signals and measurable outcomes for leadership audiences.
- Created MnM value maps and Sankey-style flow diagrams to communicate effort-to-impact-to-outcome narratives across hackathons and readouts.

Design Beyond Screens

MICROSOFT · ONGOING

- Designed hackathon T-shirts, Pinnacle editions, and Studio artefacts as intentional design objects – translating AI and experimentation themes into wearable form.
- Extended design into culture, identity, and shared memory – artefacts that anchor team identity beyond the screens that ship.

Hackathon Prototyping & Leadership

MICROSOFT · ONGOING

- Design lead across multiple Microsoft hackathons – reframed ideas toward revenue enablement, built AI-native prototypes under tight timelines.
- Influenced decisions without authority across cross-functional teams; framed outcomes for leadership clarity around revenue, scale, and cost impact.

III SKILLS

Enterprise UX	Systems Thinking	AI-Assisted Design	Copilot Workflows
Design Strategy	UX Research	User-Centred Design	Information Architecture
Interaction Design	Prototyping	Design Systems	Accessibility
Responsible AI	Stakeholder Alignment	Cross-Functional Leadership	Figma

IV EDUCATION

National Institute of Design (NID)

2017 – 2020

Master's degree, New Media Design

Savitribai Phule Pune University

2012 – 2016

Bachelor's degree, Mechanical Engineering

V HONOURS

Design Innovator
